### A Clean Menu for the Protein Movement

A high protein diet has held the title as the top diet pattern in the U.S. for three consecutive years. In addition, 70% of Americans say they are prioritizing protein and more than one-third have increased their intake in the past year.<sup>2</sup> With the rise of GLP-1s and a broader focus on macronutrients, Chipotle's new High Protein Menu offers more ways for guests to get the protein they want in the portions that work for them, whether that is a lighter bite or a more substantial build.

The High Protein Menu also features Chipotle's first-ever snack: a High Protein Cup. Inspired by real protein hacks that Chipotle guests rely on to boost their protein intake (see [HERE](#)), the High Protein Cup is 4 ounces of clean, craveable Adobo Chicken or Steak.
